Key stage 3 Computing

We really look forward to you joining us when we investigate the world of computing.

In key stage 3 you will learn about- Internet safety, Networks, Programming, Computer systems, representation of data, Spreadsheets, Cyber Security, Microbits and other fantastic projects.

To help you prepare for Liskeard it would be really helpful if you could try and do the following.

1. **Keyboard and mouse-** You will use a keyboard and a mouse in Liskeard. Therefore could you try and practise this at home e.g. could you try and start writing emails to your parents using their accounts.

2. **Learn to type-** With the help of your parents try this website which will help you learn how to type on a keyboard. https://www.typingclub.com/ . You could sign up and save your progress.

3. **Learn to code-** If you are interested in coding then visit this website which has a whole range of different coding challenges. Enough to keep you busy all summer! https://studio.code.org/courses

Many thanks and looking forward to September- Mr Morgan
